## **DETAILED ACTION**

### ***Reasons For Allowance***

1. Claims 1 and 3-10 and 12-23 are allowed. These claims are to be renumbered as 1, 2-9 and 10-21 respectively.

2. The following is a statement of reasons for allowance:

Applicant's claimed invention is deemed allowable over the prior art of record as the prior art fails to teach or suggest a method for trimming a circuit device containing trim elements, the method comprising: applying one or more trim bit sequences to the circuit device (in online mode of operation), evaluating the effect on the circuit device resulting from each of the trim bit sequences applied thereto (in online mode of operation), determining one or more optimum trim bit sequence required to achieve a desired test result (in online mode of operation), and adjusting one or more trim elements of the circuit device in accordance with the determined one or more optimum trim bit sequences (in offline mode of operation). Specifically, prior art of record fails to teach said circuit device being connected to an external electrical measurement apparatus during said online mode of operation and being disconnected from said external electrical measurement apparatus during said offline mode of operation.

Additionally, prior art fails to teach or suggest a trimming circuit for use in trimming a circuit device containing trim elements, the trimming circuit comprising: associative circuitry operative in online and offline modes of operation of said trimming circuit, said associated circuitry being further operative during said online mode of operation, for permitting the external application of trim bit sequences to said circuit device.

*Conclusion*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
